

BALLISTIC TILE

Benefits:

- Assists in ricochet reduction
- 1 1/2" thick self-sealing rubber
- Manufactured specifically for added safety in firing ranges
- Durable and resilient
- Reduces noise levels
- 100% recycled rubber
- Looks great round after round

The Ballistic Tile is a composite of a proprietary urethane adhesive and recycled crumb rubber. This crumb rubber is 100% wire and fiber free rubber that is manufactured from recycled tires. After this composite is subjected to intense pressure and heat, the molded Ballistic Tile provides acoustic insulation and superior durability while slowing handgun and rifle rounds.

Manufactured in the USA from 100% Recycled Rubber material.

SPECIFICATIONS:

Size: 2' x 2'
 Thickness: 1 1/2" (38mm)
 Density: 56 lbs/ft³ (Nominal)
 Colors: Black, Red or Green
 Composition: 100% Rubber
 Weight: 29 lbs each
 Texture: Smooth side & grid side on each tile.
 Place the grid out for acoustic needs;
 grid down for ballistic purposes.

Applications:

- Military Training
- Law Enforcement
- Gun Clubs
- Security
- Firing Ranges
- Rubber Paver

TECHNICAL DATA:

Durometer: 70 Shore A
 Coefficient of Friction:
 ASTM 1028 0.78 Dry 0.64 Wet
 Thermal Conductivity:
 ASTM C518 1.071 Btu-in/(h-ft²-°F)
 Thermal Resistance:
 ASTM C518 1.43 °F-ft²-h/Btu
 Sound Absorption:
 ASTM C384 E-NRC = .53
